

# Enterprise Database Connector Quick Reference

Published: January 26, 2006

## Introduction

Enterprise Database Connector (EDC) is an optional add-on for the DataTrack System Second Edition that enables the DataTrack Server to utilize MySQL, MSDE, SQL Server 2000, or SQL Server 2005 databases.

EDC takes advantage of the increased reliability found in high level databases, while including a simple, easy-to-use configuration interface. And, because EDC employs the latest managed database connection and transaction technologies, it offers a super-fast, ultra-robust database experience not found in competing solutions.

What's more, with its Upgrade and Migration Wizard, EDC offers a seamless upgrade path for existing customers wishing to take advantage of a more robust database.

## Supported Databases

- MySQL 4.0 and up
- MSDE and SQL Express 2005
- Microsoft SQL Server 2000
- Microsoft SQL Server 2005
- Microsoft Access

Additional database options, such as Oracle support, will become available shortly after the publication of this reference.

## Minimum Software Requirements

- Microsoft Windows NT, 2000, XP, 2003
- MDAC 2.8 (automatically installed)
- Microsoft .NET Framework 1.1 (automatically installed)

## Support and Pricing

Enterprise Database Connector is offered as a one-time, per-server licensing fee and is priced by license package. For example, customer having purchased a Startup package, could purchase EDC for \$319.99 USD.

License package	EDC Price
Startup Pkg.	\$319.99 USD
Standard Pkg.	\$429.99 USD
Small Business Pkg.	\$529.99 USD
Medium Business Pkg.	\$529.99 USD
Large Business Pkg.	\$529.99 USD
